

CSK — TEAM CAP SAIED

عيلة_مش_فرد #

Software Requirements Specification

Academy Management System

Boxing • Kickboxing • MMA • Karate • Fitness

Document Version: 1.0

Date: May 2026

Status: Ready for Implementation

Prepared for: Captain Saied (Owner)

1. Document Control

1.1 Purpose

This document defines the complete software requirements for the CSK Academy Management System, a web-based platform that will manage operations across all CSK training locations in Benha, Egypt. It is the authoritative reference for development, testing, and stakeholder review.

1.2 Audience

- Captain Saied — Owner and primary stakeholder.
- Head Coach(es) — Operational leads at each location.
- Development team — Engineers and the AI code agent implementing the system.
- QA / Testers — For verification of requirements.

1.3 Revision History

Version	Date	Author	Notes
1.0	May 2026	Development Team	Initial SRS — based on discovery rounds 1 and 2 with Captain Saied.

1.4 Glossary

- **CSK:** The academy brand — Team Cap Saied. Established 2022.
- **Head Coach:** Top operational role per location. Approves session plans, daily reports, and oversees coaches and trainees.
- **Coach:** Trainer who runs sessions, marks attendance, fills evaluations, and earns a per-coach percentage of trainee revenue.
- **Intern:** Coach-in-training. Shadows a coach. Not paid. Can be promoted to Coach by the Head Coach.
- **Trainee:** Athlete enrolled in one or more groups. Tracked for attendance, performance, evaluations, and championship eligibility.
- **Group:** A fixed cohort of trainees who train together at a specific location, on a fixed weekly schedule, for a specific discipline. Maximum 20 trainees per group.
- **Session:** A single training instance for a group. Built from training units.
- **Training Unit:** A single drill or movement (e.g., jab-cross, push-ups) with name, description, target skill/muscle, GIF demonstration, and metadata.
- **Body Map Evaluation:** An interactive body-shape interface where coaches score and comment on individual body parts and technical skills.

- **Level (N, A, B, C):** The trainee's ranking within a discipline. Updated via belt exams.
- **Venue / House:** Physical location where training takes place. Partner venues are revenue-shared; Fight Club is owned by Captain Saied.

2. Executive Summary

CSK (Team Cap Saied) is a combat sports academy operating across five locations in Benha, Egypt: Fight Club (owned by Captain Saied), Benha Sports Club, Monster GYM, AddFit GYM, and a partnership with Benha University Faculty of Sports Science. The academy focuses on Kickboxing, MMA, Boxing, Karate, and Fitness.

The current operation runs on manual record-keeping and informal communication, which limits visibility into performance, financials, and athlete progression. As the academy scales, this approach is becoming untenable.

The CSK Academy Management System is a bilingual (Arabic/English, RTL-supported) web platform that will:

- Centralize all operational data — trainees, coaches, schedules, attendance, evaluations, and reports.
- Automate the financial split between Captain Saied, partner venues, and coaches across multiple revenue streams.
- Standardize training delivery through a Head-Coach-approved library of training units composed into structured sessions.
- Provide athletes and parents with continuous visibility through daily and monthly performance reports delivered via Email and WhatsApp.
- Manage championship participation, belt examinations, medical clearances, and merchandise inventory.
- Present a public-facing CSK brand presence through a marketing website with online registration.

The system will be delivered in two phases (v1 and v2), with v1 covering the operational core required to run day-to-day academy management, and v2 adding online payments, e-commerce, native mobile, advanced analytics, and automated certificate generation.

3. Project Scope

3.1 In Scope

- Web application accessible via desktop and mobile browsers (responsive design, mobile-first considerations for coach-side workflows).
- Public-facing marketing website with online registration.
- Five user roles: System Admin, Head Coach, Coach, Intern, Trainee (with Parent-managed sub-mode for minors).
- Multi-location, multi-discipline, multi-group operations.
- Bilingual interface (Arabic/English) with full RTL support.
- Manual payment logging in v1; payment-gateway integration in v2.
- WhatsApp and Email notification delivery (via WhatsApp gateway workaround in v1).
- Cloud hosting with regular automated backups.

3.2 Out of Scope (v1)

- Native mobile applications (iOS/Android) — deferred to v2.
- Online payment gateway integrations (Paymob, Vodafone Cash API, Fawry) — deferred to v2.
- E-commerce checkout for merchandise — v1 displays a read-only catalog only.
- Auto-generated certificate PDFs — v1 supports manual issuance; v2 automates.
- Advanced analytics dashboards (BI-grade) — v2.
- Live streaming or video analysis tools.
- Integration with external federation databases.

3.3 Assumptions

- Captain Saied will provide all merchandise inventory data, training unit GIFs, and brand assets.
- A reliable WhatsApp gateway service will be selected and provisioned before v1 launch.
- Internet connectivity is available at all five training locations.
- Coaches have personal smartphones capable of running a modern web browser.
- All financial percentages provided in this document are confirmed and may be adjusted per individual coach contract via Admin settings.

3.4 Constraints

- Bilingual UI must support Arabic-first users; Arabic and English must achieve typographic parity.

- Cash and Vodafone Cash are the dominant payment methods in v1 — manual logging must be efficient enough for daily use by Head Coach or Admin.
- WhatsApp Business API in Egypt has cost and compliance considerations; v1 uses a workaround gateway acceptable to the client.

4. Stakeholders and User Roles

4.1 Role Hierarchy

The system implements a five-level role hierarchy. Each role has scoped permissions over data and actions, detailed in the Permissions Matrix (Section 12).

Level	Role	Description
1	System Admin	Captain Saied. Full access. Manages global settings, users, locations, financial rules, and inter-location data.
2	Head Coach	Operational owner per location (or across all locations). Sees full image of operations, approves all session plans and daily reports, manages championships, training units library, certificates, and belt exams.
3	Coach	Runs assigned group sessions and private sessions. Marks attendance, fills evaluations, builds session plans from approved units (subject to Head Coach approval), views own earnings.
4	Intern	Coach-in-training. Shadows a designated coach. Views attached sessions but cannot mark attendance or fill trainee evaluations. Receives self-evaluation as a learner. Promotable to Coach by Head Coach.
5	Trainee	End athlete. Views own schedule, attendance, evaluations, reports, championships, payments. May be Parent-managed for minors (flag set by Head Coach per trainee).

4.2 Sign-Up and Activation Flow

Self-registration is open to Coaches, Interns, and Trainees through the public website. Email verification is mandatory for all new accounts.

4.2.1 Coach Sign-Up

1. Coach completes registration form on the public website.
2. Email verification link sent.
3. Account created in pending state.
4. Head Coach receives notification, reviews, and assigns: location(s), disciplines, contract percentages.
5. Head Coach activates the account; Coach receives welcome WhatsApp + Email.

4.2.2 Intern Sign-Up

6. Intern registers and verifies email.

7. Account is pending approval.
8. The Coach the intern wishes to shadow confirms; Head Coach finalizes the assignment.
9. Welcome message sent on activation.

4.2.3 Trainee Sign-Up

10. Trainee (or Parent on their behalf) registers, verifies email.
11. During registration, the Parent flag is set if the trainee is a minor; in that case, the Parent is the account owner and receives all communications.
12. Account is pending Head Coach assignment to a location, group, and discipline(s).
13. On approval and activation, welcome WhatsApp + Email is sent to both Trainee and Parent (if applicable).

4.2.4 Head Coach and System Admin Accounts

Head Coach and System Admin accounts are not self-registered. They are created by an existing System Admin (or, for the first Head Coach at a location, by Captain Saied).

4.3 Parent Account Management

Whether a trainee account is Parent-managed is decided per-trainee by the Head Coach (and not by a rigid age cutoff), per Captain Saied's preference. The Parent flag controls the following:

- All notifications (WhatsApp, Email, in-app) are addressed to the Parent.
- Login credentials belong to the Parent.
- Monthly performance reports are addressed and delivered to the Parent.
- Payment is collected from / on behalf of the Parent.
- The Parent can request private sessions for the child.

A Parent may have multiple linked Trainee profiles (e.g., siblings). The Parent dashboard shows each child distinctly.

5. Locations

CSK operates from five locations in Benha. Each location's revenue-share rules and ownership status are configurable per location. The list below is the seed data; additional locations can be added at any time by the System Admin.

#	Name	District	Ownership	Default Split
1	Fight Club	El Vellal District	Owned by Captain Saied (CSK)	100% CSK
2	Benha Sports Club	Center of Benha	Partner venue	60% venue / 40% CSK
3	Monster GYM	Batta Town	Partner venue	60% venue / 40% CSK
4	AddFit GYM	El Vellal District	Partner venue	60% venue / 40% CSK
5	Faculty of Sports Science	Benha University	Patronage / partnership	Custom (configurable)

Important

Each location stores: name, district, address (with optional map coordinates for the public website), ownership flag (CSK-owned vs partner), default revenue-share configuration (per revenue stream), contact person, opening hours, and a list of disciplines offered there. A coach can be assigned to multiple locations; a trainee belongs primarily to one home location but can drop in elsewhere.

5.1 Discipline Owners (Cross-Cutting)

For disciplines other than the primary CSK disciplines (e.g., Karate, Fitness, equipment-based programs), Captain Saied negotiates a separate share with the discipline owner. The system supports per-discipline custom revenue rules layered on top of location rules.

6. Functional Requirements

This section describes every functional capability the system must provide. Requirements are grouped by module. Each requirement is uniquely numbered (e.g., FR-AUTH-01) so it can be referenced in test plans, change requests, and acceptance criteria.

Reading the requirements

Each module begins with a brief overview, then a numbered list of testable requirements. Where business rules are non-trivial (especially financials and reports), worked examples are provided in dedicated sections later in this document.

6.1 Authentication and User Management

Covers sign-up, login, password reset, email verification, role assignment, and account lifecycle.

- **FR-AUTH-01:** Self-registration shall be available for Coach, Intern, and Trainee roles. System Admin and Head Coach accounts shall be created only by an existing System Admin.
- **FR-AUTH-02:** Email verification shall be mandatory before a self-registered account can be activated.
- **FR-AUTH-03:** All self-registered accounts shall enter a 'pending approval' state until approved by the appropriate authority (Coach for Interns and Trainees attached to that coach; Head Coach for Coaches and final Trainee assignment).
- **FR-AUTH-04:** On approval, a welcome message shall be sent to the user via WhatsApp and Email. For Parent-managed Trainees, the welcome message is sent to the Parent.
- **FR-AUTH-05:** Login shall be possible via email or registered phone number, plus password.
- **FR-AUTH-06:** Password reset shall be supported via email link with time-limited token.
- **FR-AUTH-07:** Passwords shall meet a minimum strength policy (≥ 8 characters, mix of letters and digits) and be stored using industry-standard hashing (bcrypt or argon2).
- **FR-AUTH-08:** Each user profile shall capture: full name (Arabic and English), gender, date of birth, phone, email, national ID (optional), home address, profile photo, emergency contact, and role-specific fields.
- **FR-AUTH-09:** A Trainee profile flagged as Parent-managed shall additionally store the Parent's full identity, contact details, and relationship to the trainee. The Parent's credentials are used for login.
- **FR-AUTH-10:** Head Coach shall be able to promote an Intern to a Coach role; this transition preserves the user record and updates the role flag.
- **FR-AUTH-11:** Account suspension and reactivation shall be supported by System Admin and Head Coach.
- **FR-AUTH-12:** All authentication events (login, failed login, password reset, role change) shall be logged in an audit trail visible to System Admin.

6.2 Locations, Groups, and Scheduling

- **FR-LOC-01:** System Admin shall create and configure each location: name, district, address (optionally with map coordinates), ownership flag, contact person, and opening hours.
- **FR-LOC-02:** Per location, the Admin shall configure the default revenue-share percentages for each revenue stream (subscription, private session, belt exam, championship, merchandise — see Section 11).
- **FR-LOC-03:** Disciplines (Boxing, Kickboxing, MMA, Karate, Fitness, plus user-added) shall be defined globally and assigned to one or more locations.
- **FR-GRP-01:** A Group shall be defined by: name, location, discipline, level/age band, primary coach, optional intern, weekly recurring schedule (days + start/end time), and capacity (default 20).
- **FR-GRP-02:** Trainees shall be enrolled into one or more groups by the Head Coach. A trainee may belong to multiple groups simultaneously and may also take private sessions.
- **FR-GRP-03:** The system shall enforce the group capacity limit; the Head Coach can override and increase capacity per group when justified.
- **FR-GRP-04:** Schedules are fixed weekly recurring; an override per session (cancellation, time change, location change) shall be supported with notification to all enrolled trainees and parents.
- **FR-GRP-05:** A trainee from one location is permitted to drop in to another location's session, subject to coach approval. Drop-ins do not consume the home subscription's session count unless explicitly configured.
- **FR-GRP-06:** The system shall calculate and display a calendar view per location, per coach, and per trainee, showing all upcoming sessions.
- **FR-GRP-07:** Missed sessions are not refunded, not carried over, and not made up — but they are logged for reporting purposes.

6.3 Training Units Library

The Training Units Library is the curated catalogue of drills and movements that coaches assemble into structured sessions. It is the technical backbone of the academy's training delivery.

- **FR-UNIT-01:** Only the Head Coach shall create, edit, and delete training units. Coaches and Interns have read-only access.
- **FR-UNIT-02:** Each training unit shall capture: name (AR/EN), description (AR/EN), discipline tag(s), category (warm-up, technique, sparring, strength, conditioning, cool-down), target body parts/muscles, target technical skills, difficulty level, recommended duration (or rounds × time), required equipment, and a demonstration GIF.
- **FR-UNIT-03:** The demonstration GIF is a required field once the unit is published; in draft state it can be saved without one. The system supports both GIF and MP4 video formats; GIF is preferred for compactness.
- **FR-UNIT-04:** Coaches shall be able to filter the library by discipline, category, difficulty, target skill, and equipment requirement.
- **FR-UNIT-05:** A unit can be reused across any number of groups and sessions.
- **FR-UNIT-06:** Each unit displays version history: who created it, who last edited, when, and a change log.

6.4 Session Planning and Approval

Coaches build the plan for each session by selecting from the library; the Head Coach approves each plan before the session is delivered.

- **FR-SES-01:** A Session Plan is composed of an ordered sequence of training units, each with a per-unit override of duration/rounds and optional notes from the coach.
- **FR-SES-02:** Coaches shall draft session plans for assigned groups and submit them for Head Coach approval.
- **FR-SES-03:** Head Coach shall be able to approve, reject (with comment), or modify a draft session plan. A rejected plan returns to the coach with comments for revision.
- **FR-SES-04:** Approved session plans are visible to the assigned coach, the intern (if any), and (in summary form) to the trainees enrolled in the group.
- **FR-SES-05:** Session plan templates shall be reusable across multiple groups; once approved, a template can be applied to any matching group with one click.
- **FR-SES-06:** After session delivery, the coach can record the actual sequence executed (variances from the plan) for future analysis.

6.5 Attendance and Evaluations

Evaluation is the heart of the system. CSK uses a two-tier evaluation cadence: a fast per-session quick eval and a detailed weekly/monthly full body-map evaluation.

6.5.1 Attendance

- **FR-ATT-01:** The Coach marks attendance during the session via a mobile-optimized roster view: present, late, absent, or excused.
- **FR-ATT-02:** Attendance is editable by the Coach until the daily report is submitted, after which only Head Coach can edit.
- **FR-ATT-03:** The system shall compute attendance rate per trainee per group per month, used in monthly reports and in 'Best Trainee' calculations.

6.5.2 Per-Session Quick Evaluation

- **FR-EVAL-01:** Per-session quick eval per trainee shall capture: an overall effort score (1–10), one or two short notes, and an optional flag on a body part or technical skill that needs attention. Designed to be completable by the coach in under one minute per trainee.

6.5.3 Weekly/Monthly Detailed Body-Map Evaluation

- **FR-EVAL-02:** The detailed evaluation shall present a clickable interactive body-shape interface (front and back views). Tapping any body part opens a scoring panel for that part: score 1–10 plus a free-text comment.
- **FR-EVAL-03:** Body parts to be scored shall include at minimum: head/neck, shoulders (L/R), upper arms (L/R), forearms (L/R), chest, core/abs, upper back, lower back, hips, thighs (L/R), knees (L/R), shins (L/R), feet (L/R).
- **FR-EVAL-04:** In parallel with body-part scoring, technical skills shall be scored on a 1–10 scale. The skill list is discipline-aware (e.g., Boxing: jab, cross, hooks, uppercuts, footwork, head movement, defense, conditioning, sparring; Kickboxing adds: front kick, roundhouse, side kick, knee strikes; MMA adds: takedowns, ground control, submissions, ground-and-pound; Karate adds: kata, kihon, kumite; Fitness uses: cardio, strength, flexibility, endurance, agility).
- **FR-EVAL-05:** Each detailed evaluation shall record: date, evaluating coach, group context, and an overall summary comment.
- **FR-EVAL-06:** The system aggregates per-session quick evals and detailed evals into the Monthly Performance Report (Section 6.7).
- **FR-EVAL-07:** The Head Coach evaluates Coaches and Interns on a parallel framework: technical knowledge, teaching quality, punctuality, professionalism, athlete progress, and team collaboration. Coach/Intern evaluations are quarterly and feed into 'Best Trainer of the Month' selection.

- **FR-EVAL-08:** Trainees evaluate their Coach at end-of-day (anonymous to Coach; visible to Head Coach). This input is part of the daily report.

6.6 Daily Reports

- **FR-DR-01:** At the end of each session (or end of day), the Coach compiles a Daily Report for the group containing: attendance summary, per-trainee quick evaluations, session summary, executed plan vs. planned plan, any incidents, and the trainees' anonymous coach evaluation aggregated.
- **FR-DR-02:** The Daily Report enters 'pending' state once submitted. The Head Coach is notified.
- **FR-DR-03:** The Head Coach shall be able to approve, modify, or reject the Daily Report. A rejected report returns to the Coach with comments and modifications. Approved reports become visible to trainees and parents.
- **FR-DR-04:** Approval deadline: end of the next day. Reports not approved within the window remain pending and surface on the Head Coach's overdue dashboard.
- **FR-DR-05:** On approval, the Daily Report is delivered to the trainee (or Parent) via WhatsApp and Email, and visible in the in-app dashboard.

6.7 Monthly Performance Reports

- **FR-MR-01:** On the first day of each month, the system shall auto-generate a Monthly Performance Report for each active trainee, covering the previous month.
- **FR-MR-02:** The Monthly Report shall include: attendance summary (sessions attended / total scheduled), aggregated per-session effort score trend, latest detailed body-map evaluation, latest technical skills evaluation, coach's narrative summary, milestones (belt progression, championship participation, etc.), and any flagged areas for improvement.
- **FR-MR-03:** Monthly Reports are reviewed and approved by the Head Coach before delivery.
- **FR-MR-04:** Approved Monthly Reports shall be delivered as a CSK-branded PDF attachment via WhatsApp and Email to the Trainee or Parent, and viewable in-app.
- **FR-MR-05:** All historical Monthly Reports are available in the Trainee's profile timeline.

6.8 Financial Module

The financial module manages: trainee subscriptions, private session payments, belt exam fees, championship fees, merchandise sales, and the automatic computation and tracking of revenue splits between Captain Saied (CSK), partner venues, and coaches. Detailed split rules and worked examples appear in Section 11.

6.8.1 Subscriptions and Payments

- **FR-FIN-01:** Each trainee shall have one or more active subscriptions, each tied to a Group and Discipline. Default subscription = 12 sessions per month. Pricing is per-location and per-discipline (configurable).
- **FR-FIN-02:** Payment status per subscription: paid, partial, due, overdue. Subscription renewal is monthly, payable at the start of the month.
- **FR-FIN-03:** v1 supports manual payment logging by Head Coach, Admin, or designated Coach: amount, date, method (cash, Vodafone Cash, bank transfer), receipt reference, and notes. A receipt is auto-generated and shareable via WhatsApp.
- **FR-FIN-04:** Payment reminders shall be sent 3 days before the due date, on the due date, and again 3 days overdue (Email + WhatsApp on overdue).
- **FR-FIN-05:** Family/sibling discounts and other promotional discounts shall be configurable as percentage or fixed-amount adjustments per subscription.

6.8.2 Private Sessions

- **FR-FIN-06:** Private session pricing is fixed per coach (configurable). The trainee requests a slot from a coach's published availability; the coach confirms or proposes an alternative; on confirmation, payment is logged.
- **FR-FIN-07:** Each private session held at a partner venue is split per the venue's private-session rule. Private sessions at Fight Club have no venue cut.

6.8.3 Other Revenue Streams

- **FR-FIN-08:** Belt exam fees, championship registration fees, and merchandise sales each follow the split rules in Section 11. Each transaction is captured with: revenue type, gross amount, split breakdown (auto-computed), trainee/customer reference, payment date, and method.

6.8.4 Coach Earnings

- **FR-FIN-09:** Each Coach contract stores per-revenue-stream percentages: group subscription %, private session % (or fixed rate), belt exam %, championship %. Defaults exist; per-coach overrides are supported.
- **FR-FIN-10:** Coaches see a real-time earnings dashboard: month-to-date, last month, and historical, broken down by revenue stream, location, and trainee.

6.8.5 Owner Dashboards

- **FR-FIN-11:** Captain Saied (System Admin) sees consolidated dashboards: total revenue across all streams and locations, his net share after splits, per-location P&L, per-coach payouts, outstanding receivables.
- **FR-FIN-12:** All financial transactions shall be exportable to CSV/Excel for accounting.

6.9 Championships

- **FR-CH-01:** Head Coach creates each championship event: name, organizer, official/non-official, location, date(s), disciplines, weight categories, age categories, allowed levels (N/A/B/C), registration deadline, registration fee, and CSK-internal notes.
- **FR-CH-02:** Eligible trainees see open championships in their dashboard and can opt in. Their Coach must confirm the participation. Once confirmed, the trainee pays the registration fee, which is logged in the financial module.
- **FR-CH-03:** The system shall track per-fighter: weight on registration, age, amateur/professional flag, level, target weight class, and any weight-cut notes.
- **FR-CH-04:** Pre-fight medical clearance and any required documents shall be verified by the system before final confirmation; expired or missing documents block confirmation.
- **FR-CH-05:** Post-event, the Coach or Head Coach records each fighter's result: win/loss, method (KO, TKO, decision, submission), round, time, opponent name, and an optional video link or notes.
- **FR-CH-06:** Each fighter's career profile aggregates all championship results into a fight record (W-L-D and a method breakdown).
- **FR-CH-07:** Public-facing fighter profile pages shall be available on the website (v2 — fully featured; v1 — basic record).

6.10 Belt Exams

- **FR-BLT-01:** Belt examinations are organized by an external committee from the federation. The Head Coach schedules the exam in the system, defines who is eligible, and the fee.
- **FR-BLT-02:** Trainees opt in. Fees are paid before the exam, logged in the financial module under the belt-exam revenue stream.
- **FR-BLT-03:** After the exam, the Head Coach records each candidate's result: passed/failed, optional score, examiner reference, and date.
- **FR-BLT-04:** On a passing result, the trainee's level ($N \rightarrow A \rightarrow B \rightarrow C$) shall be auto-updated in their profile.
- **FR-BLT-05:** A belt exam history is preserved in the trainee's profile timeline (date, discipline, result, examiner).

6.11 Medical Records

Combat sports require strict medical compliance. The system stores both structured fields and uploaded documents.

- **FR-MED-01:** Each trainee's profile stores: blood type, allergies, chronic conditions, current medications, primary physician contact, emergency contact.
- **FR-MED-02:** The system supports uploaded medical documents (PDF/JPG/PNG): medical clearance certificate, ECG report, blood work, vision test, and any other federation-required documents. Each document has an issue date and an expiry date.
- **FR-MED-03:** All medical documents must be renewed annually. The system shall send expiry alerts 30 days, 14 days, and 7 days before expiry — to the Trainee/Parent (Email + WhatsApp) and the Head Coach (in-app).
- **FR-MED-04:** Trainees with expired or missing required documents shall be blocked from confirming championship registration.
- **FR-MED-05:** Medical records are visible to: System Admin, Head Coach, the trainee's primary Coach, and the Trainee/Parent. Other coaches do not see medical data.

6.12 Merchandise

- **FR-MRC-01:** The merchandise catalogue is managed centrally from Fight Club (the warehouse). Items: boxing gloves, shin guards, mouth guards, head guards, hand wraps, cup guards, T-shirts, shorts (all CSK branded).
- **FR-MRC-02:** Each item stores: name, description, photos, size variants, color variants, cost price, sale price, current stock level, low-stock threshold.
- **FR-MRC-03:** Sales are 100% to CSK (no venue split). Cost price is tracked so that profit per item and per period is reportable.
- **FR-MRC-04:** v1: in-person sales logged manually (item, quantity, price, customer ref optional, date). The catalogue is shown on the public website but checkout is not available — interested customers contact the academy.
- **FR-MRC-05:** v2: full e-commerce checkout with payment gateway, shipping, and inventory automation.

6.13 Notifications

All system events that affect users shall trigger notifications according to the channel matrix below.

Event	WhatsApp	Email	In-App
Welcome on activation	✓	✓	✓
Daily report ready (approved)	✓	✓	✓
Monthly report ready (approved)	✓	✓	✓
Payment reminder (3 days before)	—	✓	✓
Payment overdue	✓	✓	✓
Session cancellation / rescheduled	✓	✓	✓
Session approved / rejected (coach)	—	✓	✓
Belt exam scheduled / available	✓	✓	✓
Championship registration open	✓	✓	✓
Medical document expiring (30/14/7 days)	✓	✓	✓
Account approval state change	—	✓	✓
Daily report needs revision (coach)	—	✓	✓
Best Trainee/Coach award (monthly)	✓	✓	✓

- **FR-NOT-01:** WhatsApp delivery uses the workaround gateway selected for v1. The system shall isolate the gateway behind a notification-service abstraction so that switching to the official WhatsApp Business API in v2 requires no application-code changes.
- **FR-NOT-02:** Email delivery uses an SMTP-compatible transactional service (e.g., SendGrid, Mailgun, or Amazon SES).
- **FR-NOT-03:** All notifications shall include CSK branding (logo, colors), and be issued in the user's preferred language (Arabic or English).
- **FR-NOT-04:** Each user shall be able to view and manage their notification preferences (opt-out of non-critical channels). Critical notifications (payment overdue, medical expiry) cannot be opted out.
- **FR-NOT-05:** All sent notifications are logged with delivery status; failures retry up to 3 times before flagging on the Admin dashboard.

6.14 Certificates

- **FR-CRT-01:** Each month, the system shall identify candidates for: Best Trainee per group, Best Trainee overall (per location), and Best Trainer (Coach) per location.
- **FR-CRT-02:** Selection criteria combine: attendance rate, commitment indicators, highest evaluation average, and Coach pick. The Head Coach reviews the system-generated shortlist and confirms final selections.
- **FR-CRT-03:** v1: certificates can be manually issued from a CSK-branded PDF template; the system records who received which certificate, when, and the reason. v2: full automation — certificate PDFs auto-generated and delivered.
- **FR-CRT-04:** All issued certificates appear in the recipient's profile timeline and are mentioned in their Monthly Report.

6.15 Public Website

The public website is the marketing front door of CSK and the entry point for new trainees and coaches. It shares branding, navigation, and design language with the management application but operates as a separate public surface.

- **FR-WEB-01:** Pages required for v1: Home, About CSK, Locations (with maps), Disciplines, Coaches, Schedule by location, Pricing/Plans, Online Registration (creates pending Trainee account), Champion Showcase (basic), Blog/News, Contact, and Login.
- **FR-WEB-02:** Bilingual content (Arabic/English) with full RTL support; language toggle is global.
- **FR-WEB-03:** Merchandise catalogue is shown read-only in v1 (browse and contact). Online checkout is v2.
- **FR-WEB-04:** SEO basics: meta tags, sitemap, structured data for academy and locations, fast page-load on mobile.
- **FR-WEB-05:** All form submissions (registration, contact) generate a notification to the appropriate Head Coach and Admin, and a confirmation reply to the submitter.

7. Non-Functional Requirements

7.1 Performance

- **NFR-PERF-01:** Page-load time on a 4G mobile connection shall be under 3 seconds for all primary user flows (login, attendance, evaluation, dashboard).
- **NFR-PERF-02:** The system shall support at least 500 concurrent users without degradation.
- **NFR-PERF-03:** Background jobs (monthly report generation, notification delivery) shall not impact interactive performance.

7.2 Security

- **NFR-SEC-01:** All traffic shall use HTTPS with TLS 1.2+.
- **NFR-SEC-02:** Passwords are stored using bcrypt or argon2 with appropriate cost factor.
- **NFR-SEC-03:** All database backups are encrypted at rest.
- **NFR-SEC-04:** Personally identifiable information (national ID, medical records) is access-controlled per the permissions matrix and access is audit-logged.
- **NFR-SEC-05:** Standard OWASP Top-10 protections shall be implemented (CSRF, XSS, SQLi, secure file upload validation).
- **NFR-SEC-06:** API endpoints are protected by authentication and role-based authorization on every request.

7.3 Availability and Reliability

- **NFR-AV-01:** Target uptime: 99.5% monthly (excluding pre-announced maintenance windows).
- **NFR-AV-02:** Automated daily backups of the database and uploaded media; weekly full backups retained for 90 days.
- **NFR-AV-03:** Recovery Point Objective (RPO): 24 hours. Recovery Time Objective (RTO): 4 hours.

7.4 Usability

- **NFR-USE-01:** Mobile-first design for coach-side workflows (attendance, quick eval) — these must be operable single-handed during a session.
- **NFR-USE-02:** Bilingual UI: every screen, label, and notification has both Arabic and English variants. RTL layout is honored throughout.
- **NFR-USE-03:** Visual design follows CSK brand: black, gold accents, modern combat-sports aesthetic.
- **NFR-USE-04:** WCAG 2.1 AA accessibility targeted for the public website.

7.5 Maintainability and Extensibility

- **NFR-MNT-01:** Codebase shall follow standard layered architecture: presentation, application/service, domain, persistence.
- **NFR-MNT-02:** Notification, payment, and storage adapters are abstracted behind interfaces to allow swapping providers.
- **NFR-MNT-03:** Feature flags shall be used to enable/disable v2 features at runtime.
- **NFR-MNT-04:** All code is under version control; CI runs automated tests on every change.

7.6 Compliance and Data

- **NFR-CMP-01:** Personal data of minors is governed by the Parent's consent given at registration.
- **NFR-CMP-02:** Data export per user (GDPR-style) shall be supported on request to the System Admin.
- **NFR-CMP-03:** Data retention: trainee records retained while account is active and 5 years after deactivation; financial records retained 10 years.

8. Permissions Matrix

This matrix defines, for each major action in the system, which roles can perform it. ✓ = allowed; — = not allowed; ◉ = conditionally allowed (see notes).

Action	Admin	Head Coach	Coach	Intern	Trainee
Create/edit locations and discipline rules	✓	—	—	—	—
Create Head Coach accounts	✓	—	—	—	—
Configure global financial split rules	✓	—	—	—	—
Approve Coach/Trainee/Intern signup	✓	✓	◉ (own attached interns/trainees)	—	—
Promote Intern to Coach	✓	✓	—	—	—
Create/edit Training Units	✓	✓	—	—	—
Build session plans for assigned groups	✓	✓	✓	—	—
Approve session plans	✓	✓	—	—	—
Mark attendance	—	◉ (any group)	✓ (own groups)	—	—
Fill trainee evaluations (per session and detailed)	—	✓	✓ (own trainees)	—	—
Submit daily reports	—	✓	✓	—	—
Approve/modify/reject daily reports	✓	✓	—	—	—
Approve monthly reports	✓	✓	—	—	—
Log payments	✓	✓	◉ (with permission)	—	—
View own earnings	✓	✓	✓	—	—
View consolidated financial dashboards	✓	◉ (location-scope d)	—	—	—
Create championships	✓	✓	—	—	—
Confirm trainee championship participation	✓	✓	✓ (own trainees)	—	—
Record championship results	✓	✓	✓ (own trainees)	—	—

Action	Admin	Head Coach	Coach	Intern	Trainee
Schedule belt exams; record results	✓	✓	—	—	—
View medical records	✓	✓	• (own primary trainees)	—	• (own only)
Manage merchandise catalogue and stock	✓	✓	—	—	—
Log merchandise sales	✓	✓	•	—	—
Issue certificates	✓	✓	—	—	—
Edit own profile	✓	✓	✓	✓	✓
View own schedule and reports	✓	✓	✓	✓	✓
Request private session	—	—	—	—	✓
Confirm private session	—	—	✓	—	—
Evaluate own coach (anonymous)	—	—	—	—	✓
Evaluate coaches and interns	—	✓	—	—	—

9. Data Model — Entity Reference

This section catalogues the principal entities. Each entity lists its key attributes; a complete physical schema (with column types, indices, and foreign keys) will be produced during the implementation phase.

9.1 Core Entities

User

- user_id (PK), role (admin/head_coach/coach/intern/trainee), email, phone, password_hash, full_name_ar, full_name_en, gender, dob, profile_photo, national_id (optional), preferred_language, timezone, status (pending/active/suspended), created_at, last_login_at, parent_managed (boolean, trainees only), parent_user_id (FK, trainees only).

Location

- location_id (PK), name_ar, name_en, district, address, latitude, longitude, ownership_flag (CSK_owned / partner / patronage), contact_person, opening_hours_json, default_split_config_id (FK), active.

Discipline

- discipline_id (PK), name_ar, name_en, category (boxing/kickboxing/mma/karate/fitness/other), skills_taxonomy_json, owner_user_id (FK, optional — for negotiated owners).

Group

- group_id (PK), name, location_id (FK), discipline_id (FK), level_band, age_band, primary_coach_id (FK), intern_id (FK, optional), schedule_json (recurring weekly), capacity (default 20), active.

Enrollment

- enrollment_id (PK), trainee_id (FK), group_id (FK), start_date, end_date, status (active/paused/ended), subscription_id (FK).

Subscription

- subscription_id (PK), trainee_id (FK), group_id (FK), discipline_id (FK), location_id (FK), monthly_fee, sessions_per_month (default 12), discount_percent, discount_reason, current_period_start, current_period_end, payment_status, created_at.

TrainingUnit

- unit_id (PK), name_ar, name_en, description_ar, description_en, discipline_tags[], category, target_body_parts[], target_skills[], difficulty (1-5), recommended_duration_seconds,

equipment_required[], demo_media_url, demo_media_type (gif/mp4), version, created_by (FK), updated_at.

SessionPlan

- plan_id (PK), group_id (FK), session_date, status (draft/pending/approved/rejected), units_sequence_json (ordered list with per-unit overrides), notes, created_by (FK), reviewed_by (FK), reviewed_at, rejection_comment.

Session

- session_id (PK), plan_id (FK), group_id (FK), location_id (FK), coach_id (FK), intern_id (FK), scheduled_start, scheduled_end, actual_start, actual_end, status, notes.

Attendance

- attendance_id (PK), session_id (FK), trainee_id (FK), status (present/late/absent/excused), arrival_time, marked_by (FK), marked_at.

QuickEvaluation

- quick_eval_id (PK), session_id (FK), trainee_id (FK), effort_score (1-10), notes, flagged_body_part, flagged_skill, created_by (FK), created_at.

DetailedEvaluation

- detailed_eval_id (PK), trainee_id (FK), evaluator_id (FK), context_group_id (FK), evaluation_date, period (weekly/monthly), body_part_scores_json (map of body_part → {score, comment}), skill_scores_json (map of skill → {score, comment}), summary_comment, created_at.

DailyReport

- report_id (PK), session_id (FK), group_id (FK), coach_id (FK), submitted_at, status (draft/pending/approved/rejected), summary, incidents, head_coach_notes, reviewed_by, reviewed_at, delivered_at.

MonthlyReport

- monthly_report_id (PK), trainee_id (FK), period_year, period_month, attendance_summary_json, evaluation_summary_json, milestones_json, narrative, status (draft/approved), generated_at, approved_by (FK), approved_at, delivered_at, pdf_url.

Payment

- payment_id (PK), revenue_type (subscription/private/belt_exam/championship/merchandise), reference_id (FK to relevant entity), payer_user_id (FK), amount_gross, amount_net, currency (EGP), method (cash/vodafone_cash/bank_transfer/online), receipt_number, paid_at, logged_by (FK), notes.

RevenueSplit

- split_id (PK), payment_id (FK), recipient_type (CSK/venue/coach/federation/tax), recipient_user_id (FK, nullable), recipient_location_id (FK, nullable), amount, percent, computed_at.

CoachContract

- contract_id (PK), coach_user_id (FK), location_id (FK, optional), discipline_id (FK, optional), subscription_percent, private_session_rate_or_percent, belt_exam_percent, championship_percent, effective_from, effective_to, active.

Championship

- championship_id (PK), name, organizer, official_flag, location, start_date, end_date, disciplines[], weight_categories_json, age_categories_json, allowed_levels[], registration_deadline, registration_fee, notes, created_by (FK).

ChampionshipRegistration

- registration_id (PK), championship_id (FK), trainee_id (FK), weight_kg, age, amateur_flag, level, target_weight_class, status (opted_in/coach_confirmed/paid/withdrew), payment_id (FK).

FightResult

- result_id (PK), registration_id (FK), opponent_name, outcome (win/loss/draw/no_contest), method (ko/tko/decision/submission/dq/other), round, time_in_round, video_url, notes, recorded_by (FK).

BeltExam

- exam_id (PK), discipline_id (FK), exam_date, location, examiner_name, federation, fee, notes.

BeltExamResult

- exam_result_id (PK), exam_id (FK), trainee_id (FK), result (passed/failed), score, new_level (on pass), recorded_by (FK), recorded_at.

MedicalRecord

- medical_id (PK), trainee_id (FK), blood_type, allergies, chronic_conditions, medications, primary_physician_contact, emergency_contact, last_updated_at.

MedicalDocument

- doc_id (PK), trainee_id (FK), document_type (clearance/ecg/blood/vision/other), file_url, issue_date, expiry_date, issuing_doctor, status (active/expired).

MerchandiseItem

- item_id (PK), name, description, photos[], category, variants_json (size/color/SKU), cost_price, sale_price, stock_level, low_stock_threshold.

MerchandiseSale

- sale_id (PK), item_id (FK), variant_sku, quantity, unit_price, total_price, customer_user_id (FK, optional), payment_id (FK), sold_at, sold_by (FK).

Notification

- notification_id (PK), recipient_user_id (FK), event_type, channel (whatsapp/email/in_app), payload_json, status (queued/sent/failed), retry_count, sent_at, delivered_at.

Certificate

- certificate_id (PK), recipient_user_id (FK), award_type, group_id (FK, optional), period_year, period_month, narrative, issued_by (FK), issued_at, pdf_url.

AuditLog

- audit_id (PK), actor_user_id (FK), action, entity_type, entity_id, changes_json, ip_address, user_agent, created_at.

10. Financial Calculation Rules

This section is the authoritative reference for revenue splits. The system applies these rules automatically every time a payment is logged. All percentages are configurable per location and per coach contract; the values shown are the defaults.

Confirmation needed

These default percentages are based on Captain Saied's notes. The Admin UI allows editing per location and per revenue stream at any time without code changes. If any default below is wrong, it is changed in Admin settings — not in code.

10.1 Revenue Streams Overview

Revenue stream	Venue	CSK	Coach	Other
Group subscription (partner)	60%	25%	15% (default)	—
Group subscription (Fight Club)	—	85%	15% (default)	—
Private session (partner)	50%	20%	30% (fixed)	—
Private session (Fight Club)	—	70%	30% (fixed)	—
Belt exam fee	—	90%	4%	6% federation
Championship registration	—	90%	4%	6% tax/admin
Merchandise (any location)	—	100%	—	Cost price tracked separately
Other-discipline (Karate/Fitness/etc.)	Negotiated	Negotiated	Negotiated	Per-discipline custom rule

10.2 Worked Examples

Example 1 — Group subscription at Monster GYM

Trainee Ahmed pays his monthly subscription of 1,000 EGP for Boxing at Monster GYM. His Coach is Coach Mohamed, on the default 15% subscription contract.

- Gross: 1,000 EGP
- Venue (Monster GYM, 60%): 600 EGP
- CSK (Captain Saied, 25%): 250 EGP

- Coach Mohamed (15%): 150 EGP
- Total accounted: 1,000 EGP ✓

Example 2 — Group subscription at Fight Club

Trainee Khaled pays his monthly subscription of 1,000 EGP for MMA at Fight Club (CSK-owned). His Coach is Coach Tarek, on a 20% subscription contract (negotiated, overrides the 15% default).

- Gross: 1,000 EGP
- Venue: not applicable (CSK-owned)
- CSK (80%): 800 EGP
- Coach Tarek (20%): 200 EGP
- Total accounted: 1,000 EGP ✓

Example 3 — Private session at AddFit GYM

Trainee Yara books a private kickboxing session with Coach Mohamed at AddFit GYM. Private session fee: 500 EGP.

- Gross: 500 EGP
- Venue (AddFit, 50%): 250 EGP
- CSK (20%): 100 EGP
- Coach Mohamed (30% fixed): 150 EGP
- Total accounted: 500 EGP ✓

Example 4 — Belt exam fee

Trainee Ahmed pays the belt exam fee of 800 EGP. Coach Mohamed is the recommending coach.

- Gross: 800 EGP
- Federation (6%): 48 EGP
- Coach Mohamed (4%): 32 EGP
- CSK (90%): 720 EGP
- Total accounted: 800 EGP ✓

Example 5 — Championship registration

Trainee Khaled registers for an official MMA championship; the registration fee charged to him is 1,500 EGP. His Coach is Tarek.

- Gross: 1,500 EGP
- Tax/admin (6%): 90 EGP
- Coach Tarek (4%): 60 EGP

- CSK (90%): 1,350 EGP
- Total accounted: 1,500 EGP ✓

Example 6 — Merchandise sale

Trainee Sara buys CSK-branded boxing gloves at Benha Sports Club. Sale price: 600 EGP. Cost price: 350 EGP.

- Gross revenue: 600 EGP → 100% to CSK
- Cost of goods sold (COGS): 350 EGP
- Gross profit on sale: 250 EGP
- Note: The venue takes no cut on merchandise, regardless of where the sale occurs.

10.3 Computation Rules and Edge Cases

- All percentages are stored to 2 decimal places; intermediate calculations use full precision; final amounts round to the nearest piastre (0.01 EGP).
- If a per-coach contract overrides a default, the contract value applies. If the contract is missing a value for a stream, the location default applies.
- If a discounted subscription is paid, the discount is applied first to the gross, then the split runs on the discounted amount.
- If a payment is partial, splits are computed pro-rata at the time of each partial payment.
- If a payment is refunded, all splits are reversed in equal proportion; reversal entries are visible in the audit trail.
- All split amounts must sum to 100% of the gross (after discounts and rounding adjustments). The system enforces this invariant on every transaction.

11. Screen Inventory by Role

This section lists the screens each role will see. The list is intentionally implementation-agnostic — exact layout, navigation, and component design are produced during the design phase. Screens with an asterisk (*) are mobile-priority — they must be highly usable on a phone.

11.1 System Admin (Captain Saied)

- Dashboard — global KPIs: total active trainees, MTD revenue, MTD CSK share, overdue payments, expiring medical docs, pending approvals queue.
- Locations management — list, add, edit, archive.
- Disciplines management — list, add, edit.
- Users management — full directory, filter by role/location/status, edit any user, suspend/reactivate.
- Coach contracts — view/edit per-coach contract terms.
- Financial settings — default split rules per location and per revenue stream.
- Financial reports — consolidated income, by location, by stream, by month; exportable.
- Coach payouts — what each coach earned, ready to pay, paid history.
- Audit log — all sensitive actions across the system.
- Notifications health — delivery success/failure rates.
- System settings — branding assets, language packs, notification templates, backup settings.

11.2 Head Coach

- Dashboard — operational view per location: today's sessions, pending session-plan approvals, pending daily reports, expiring medical docs, upcoming championships.
- Approvals inbox — session plans pending, daily reports pending.
- Trainees — directory with filters; view/edit profiles, assign to groups, set Parent-managed flag, view full history.
- Coaches and Interns — directory; approve signups, assign to locations and disciplines, configure contract %, promote intern→coach, evaluate coaches.
- Groups and Schedule — create/edit groups, manage weekly schedule, override individual sessions.
- Training Units library — create/edit/archive units, upload GIFs.
- Session plans — review, modify, approve, reject.
- Daily reports — review, modify, approve, reject.
- Monthly reports — review and approve before delivery.

- Championships — create event, manage registrations, record results.
- Belt exams — schedule, manage, record results.
- Medical compliance — at-a-glance view of expired/expiring documents per trainee.
- Merchandise — stock levels, low-stock alerts, log sales.
- Certificates — issue Best Trainee/Coach awards.
- Communications — broadcast announcements (WhatsApp/Email) to filtered audience.
- Financial dashboard (location-scoped).

11.3 Coach

- Dashboard* — today's sessions, alerts, MTD earnings.
- My groups — list of assigned groups; tap into a group to see roster, schedule, and recent sessions.
- Today's session* — attendance roster, mark per-trainee, tap into per-trainee quick eval.
- Quick eval form* — single-screen, single-handed: effort 1–10, notes, body-part flag, technical-skill flag.
- Detailed evaluation — interactive body-shape interface, skills grid, summary comment.
- Session plans — draft from training units library, submit for approval, see feedback on rejection.
- Training units — browse and filter the library (read-only).
- My private sessions — availability calendar, requests inbox, confirmations.
- Daily report* — compose, submit; see Head Coach feedback.
- My trainees — full list with profile, history, evaluations, and notes.
- Earnings dashboard — MTD, last month, history; per-revenue-stream breakdown.
- Profile and settings.

11.4 Intern

- Dashboard — assigned coach, today's shadowed sessions.
- My sessions — read-only view of attached sessions and their plans.
- Training units — browse the library to study.
- Self-evaluation — complete own learning evaluation.
- Profile and settings.

11.5 Trainee / Parent

- Dashboard — next session, recent reports, payment status, alerts.
- My schedule — upcoming sessions, history.

- My evaluations — latest body-map evaluation, technical skills, history.
- My reports — daily report archive, monthly reports archive (with PDF download).
- Subscription and payments — current subscription status, payment history, log new payment (manual receipt).
- Private sessions — request a slot from a coach's availability, manage requests.
- Championships — open events I'm eligible for, my registrations, my fight record.
- Belt exams — upcoming exams, my exam history, my levels by discipline.
- Medical — my records, upload documents, see expiry.
- Merchandise — browse catalogue (v1: contact only; v2: cart and checkout).
- Profile and settings — language preference, notification preferences, change password.
- Certificates — my awards.
- (Parent only) Children — list of linked trainee children; tap each to see their full dashboard.

12. API Outline

The system shall expose a RESTful API consumed by the web front-end and (in v2) by the native mobile app. All endpoints are versioned (/api/v1/...), authenticated via session or token, and return JSON. The list below is indicative of the required endpoint families; the implementation team will produce the complete OpenAPI spec.

12.1 Authentication

- POST /auth/register — public; create pending account.
- POST /auth/verify-email — confirm via token.
- POST /auth/login — exchange credentials for session/token.
- POST /auth/logout.
- POST /auth/forgot-password / POST /auth/reset-password.
- GET /auth/me — current user profile.

12.2 Users

- GET /users — list (filtered, paginated, role-scoped).
- POST /users — create (admin/head-coach scoped).
- GET /users/:id, PATCH /users/:id, DELETE /users/:id.
- POST /users/:id/approve, POST /users/:id/suspend, POST /users/:id/promote.

12.3 Locations, Disciplines, Groups

- CRUD /locations, /disciplines, /groups.
- POST /groups/:id/enroll — enroll trainee.
- GET /groups/:id/schedule — recurring + overrides.

12.4 Training Units and Session Plans

- CRUD /training-units.
- POST /training-units/:id/media — upload GIF/MP4.
- CRUD /session-plans.
- POST /session-plans/:id/submit, POST /session-plans/:id/approve, POST /session-plans/:id/reject.

12.5 Sessions, Attendance, Evaluations

- GET /sessions, GET /sessions/:id.

- POST /sessions/:id/attendance — bulk mark.
- POST /sessions/:id/quick-evaluations — bulk per-trainee.
- CRUD /detailed-evaluations.

12.6 Reports

- CRUD /daily-reports — submit/approve/reject/edit.
- GET /monthly-reports/:trainee_id/:year/:month.
- POST /monthly-reports/generate — manual trigger; default is scheduled monthly.

12.7 Financial

- CRUD /payments.
- GET /payments/:id/splits — computed splits.
- GET /coach-earnings/:coach_id?period=...
- GET /financial-summary?location=...&period=...
- GET /export/financial?format=csv&period=...

12.8 Championships, Belt Exams, Medical

- CRUD /championships, /championship-registrations, /fight-results.
- CRUD /belt-exams, /belt-exam-results.
- CRUD /medical-records, /medical-documents (file upload).

12.9 Merchandise, Notifications, Certificates

- CRUD /merchandise-items, /merchandise-sales.
- GET /notifications, POST /notifications/test (admin).
- CRUD /certificates.

12.10 Public Website Endpoints

- GET /public/locations, /public/disciplines, /public/coaches (sanitized profile data only).
- POST /public/contact, POST /public/register-trainee.
- GET /public/champions — fighter showcase (v2).

13. Phasing — v1 and v2

To manage scope and risk, the system is delivered in two phases. v1 establishes the operational core; v2 extends with payment automation, e-commerce, deep championship/belt features, automation, and a native mobile app.

13.1 v1 Scope (Operational Core)

- All five user roles, sign-up flows, email verification, parent-managed flag.
- Locations, disciplines, groups, weekly recurring schedules, session overrides.
- Training Units library with GIF/MP4 demonstrations.
- Session planning + Head Coach approval workflow.
- Attendance + quick per-session evaluation + interactive body-map detailed evaluation.
- Daily reports with approval flow → delivered via Email + WhatsApp.
- Monthly performance reports auto-generated as CSK-branded PDFs → delivered via Email + WhatsApp.
- Financial: manual payment logging, automatic split calculation, earnings dashboards (per coach, per location, per Captain Saied).
- Medical records and documents with expiry alerts.
- Championships: opt-in, coach confirmation, fee payment, basic fighter profile.
- Belt exams: scheduling, fee payment, results, automatic level update.
- Merchandise: catalogue and stock management; manual sale logging; read-only catalogue on website.
- Notifications via WhatsApp gateway workaround + Email + In-app.
- Public website with marketing pages and online registration form.
- Bilingual UI (Arabic/English) with full RTL support.
- Mobile-responsive web (no native app yet).
- CSK brand applied throughout (colors, logo, certificates, reports).

13.2 v2 Scope (Enhancements)

- Online payment integration: Paymob, Vodafone Cash API, Fawry.
- E-commerce: full merchandise checkout with payment gateway and shipping.
- Championship deep tracking: full method/round/time results, public fighter showcase on website with auto-updating record.
- Auto-generated certificate PDFs (Best Trainee, Best Coach, Best Group monthly) — auto-delivered.

- Advanced analytics dashboards: cohort analysis, retention, lifetime value, coach performance benchmarking.
- Native mobile applications (iOS + Android) using the same API.
- Official WhatsApp Business API migration from the v1 gateway workaround.
- Advanced search and reporting (custom filters, saved views, scheduled exports).
- Optional integrations: federation rosters, video analysis platforms.

13.3 Indicative Timeline

Phase	Duration	Outcome
Discovery & Design	3–4 weeks	Wireframes, visual design system, finalized data schema, OpenAPI spec, brand assets integration.
v1 Development	12–16 weeks	Full operational core build, with rolling internal demos at end of each 2-week sprint.
v1 UAT & Pilot	3–4 weeks	Captain Saied + 1 location pilot. Bug-fix and polish.
v1 Launch	1–2 weeks	Roll out to all five locations, training and onboarding.
v2 Development	8–12 weeks	Built on v1 production data; payment and e-commerce; native app; advanced analytics.

Total v1: approximately 5–6 months from discovery to launch. Timelines are indicative and depend on team size, scope confirmation, and asset delivery (GIFs, copy, brand specifications).

14. Assumptions, Open Items, and Risks

14.1 Assumptions Locked-In

These items were addressed during discovery and are treated as confirmed. Any change requires a formal change request.

- Default revenue split for partner-venue group subscriptions: 60% venue / 25% CSK / 15% coach (per-coach contract may override).
- Fight Club is CSK-owned: 85% CSK / 15% coach default.
- Belt exam fees: 90% CSK / 4% coach / 6% federation.
- Championship fees: 90% CSK / 4% coach / 6% tax/admin.
- Merchandise: 100% CSK, regardless of sale location.
- Private session: coach gets 30% (fixed); venue gets 50% at partner venues, 0% at Fight Club; CSK gets the remainder.
- Default subscription = 12 sessions/month. Missed sessions: no refund, no carry-over, no make-up.
- Group capacity: 20 trainees default.
- Schedules: fixed weekly recurring.
- Cross-location drop-ins: permitted with coach approval; do not consume home-subscription session count.
- Daily report approval deadline: end of next day; pending state if exceeded.
- All medical documents must be renewed annually; trainees with expired docs are blocked from championship registration.
- Body-map evaluation is implemented as an interactive clickable body-shape interface.
- Per-session quick eval is mandatory; detailed body-map evaluation is weekly or monthly cadence.
- Parent-managed flag is set per trainee by the Head Coach (not by a rigid age cutoff).
- WhatsApp delivery via gateway workaround in v1; abstracted behind an interface for clean migration to official Business API in v2.

14.2 Items Still Open / Confirm Before Build

Action required before development begins

These items affect the build and should be confirmed by Captain Saied before implementation starts. Defaults are noted; if no change is requested, the defaults below will be implemented.

- **Subscription pricing per location and per discipline:** list of monthly fees needed. Default to be configured at first install via Admin.
- **Family/sibling discount policy:** default — none; configurable per family in Admin.
- **Private session pricing:** fixed per coach; specific amounts to be entered by Admin at first install.
- **Belt exam and championship fee schedules:** specific amounts to be entered per event by the Head Coach.
- **Merchandise catalogue:** items, photos, sizes, colors, prices, and starting stock to be loaded by Admin.
- **WhatsApp gateway provider choice:** developer team to recommend (UltraMsg, 360dialog, Twilio, or similar) based on cost and Egypt availability.
- **Email transactional provider:** developer team to recommend (SendGrid, Mailgun, Amazon SES).
- **Cloud hosting provider:** developer team to recommend; AWS, DigitalOcean, or Hetzner are all suitable.
- **Domain name and brand assets:** Captain Saied to provide CSK domain, high-resolution logo files, brand colors and typography (current black + gold confirmed).
- **Privacy policy and terms of use:** to be drafted with legal counsel before public-website launch.

14.3 Risks and Mitigations

Risk	Likelihood / Impact	Mitigation
WhatsApp gateway throttling or compliance issue	Medium / High	Abstract behind notification-service interface; have email as guaranteed fallback; plan migration to official WhatsApp Business API in v2.
Coach resistance to digital workflow	Medium / Medium	Mobile-first design for coach screens; under-1-minute attendance and quick-eval flows; pilot with one coach champion before broad rollout.
Financial split misconfiguration	Low / High	Worked examples in Section 10; system enforces sum-to-100% invariant; admin preview before activation; full audit trail.
Scope creep during v1	High / High	This SRS is the contract; new requirements go through formal change requests with cost/time impact assessment.
Bilingual content quality (Arabic UX)	Medium / Medium	Engage native Arabic speaker for translation and UX review; budget for bilingual QA pass.
Cash-payment fraud or recording errors	Medium / High	Manual receipts auto-numbered; daily reconciliation reports for Head Coach; audit log on every payment edit.

Risk	Likelihood / Impact	Mitigation
Medical compliance lapses	Low / High	Multi-stage expiry alerts (30/14/7 days); hard block on championship registration with expired docs; Head Coach dashboard surfaces all expiring docs.

15. Acceptance and Sign-Off

This SRS becomes the agreed scope for v1 once signed below. Subsequent changes follow the formal change-request process: written description, impact assessment (cost and time), and re-sign-off.
